

The Features Map

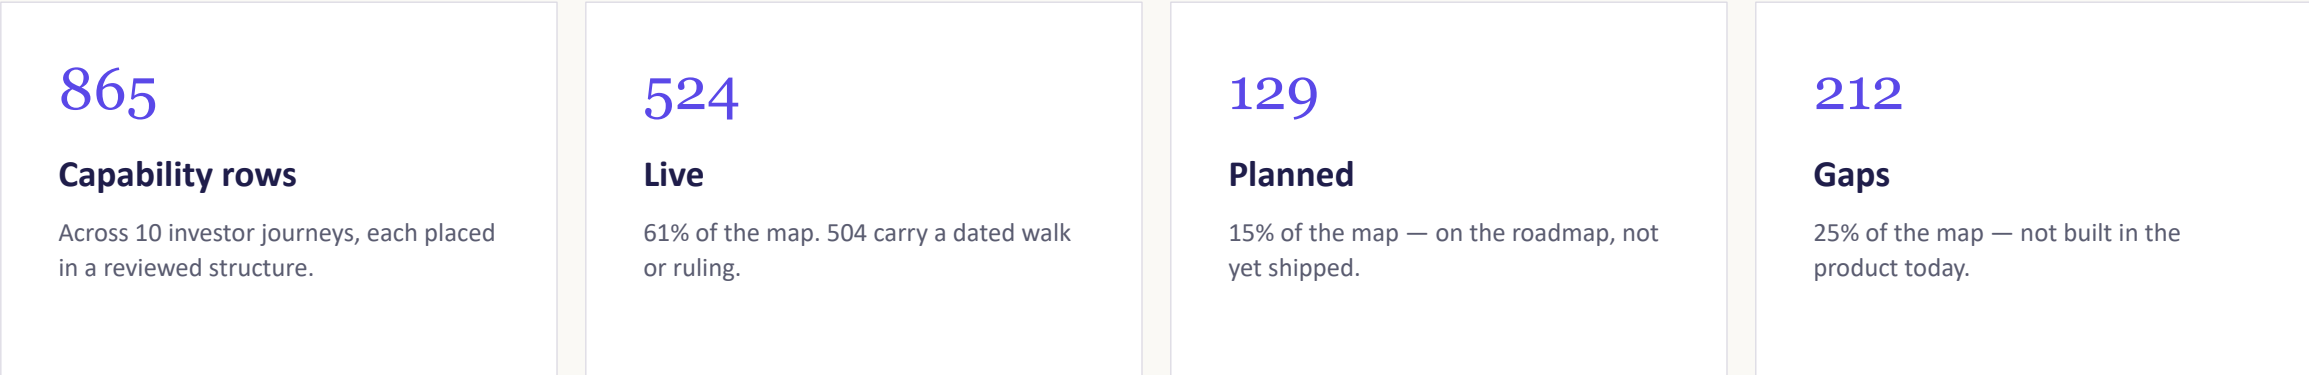

Baseline v2.21 · 31 August 2026

865 capability rows across 10 investor journeys — every one decided.

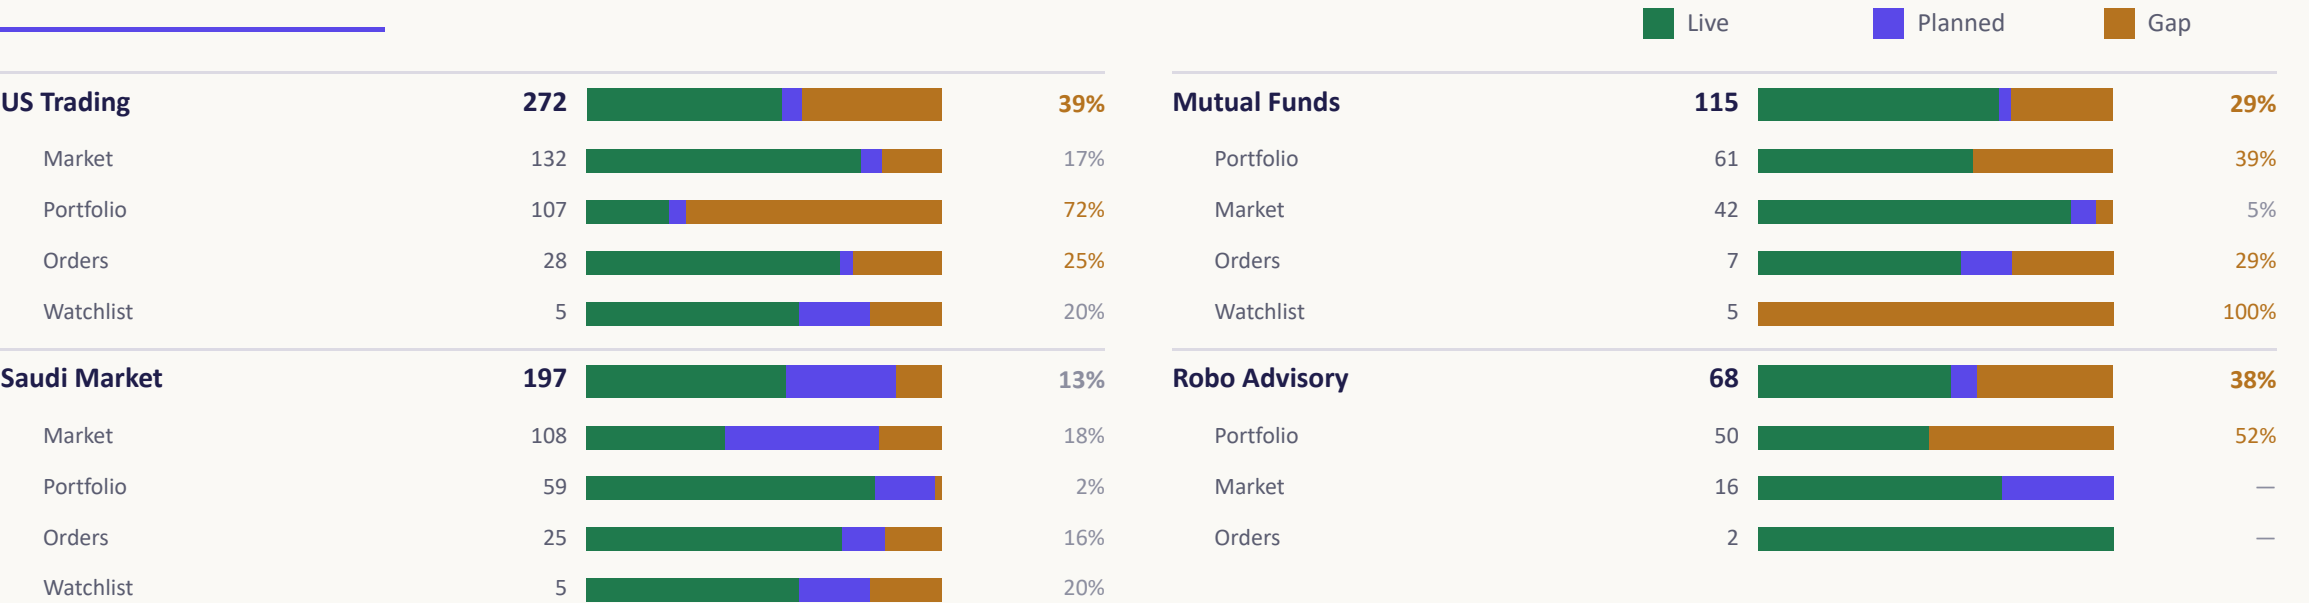

One record of what ARC has.

Every capability ARC ships, is building, or has not built — with a status that traces to evidence rather than opinion.

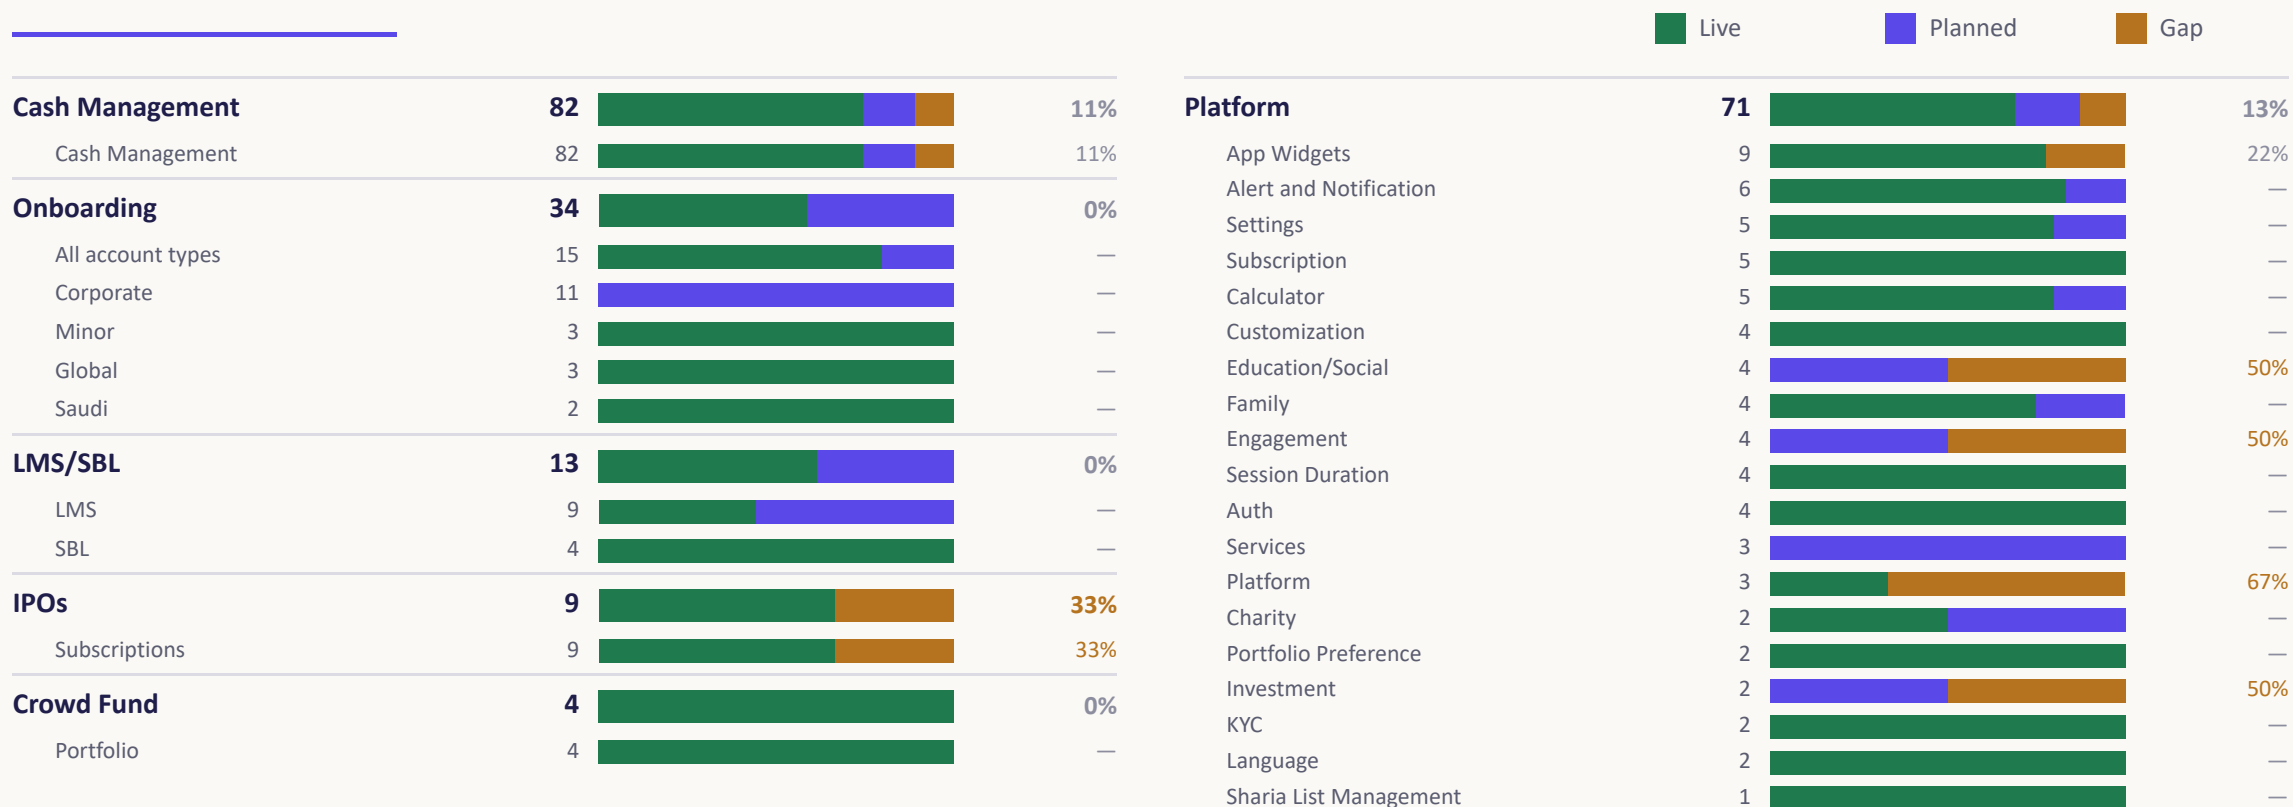

Journey by journey, area by area.

The four trading journeys as the map nests them — 652 of the 865 rows.

The rest of the map.

Cash Management, Onboarding, LMS/SBL, IPOs, Crowd Fund and every Platform area — the remaining 213 rows.

One gap list, repeated in three products.

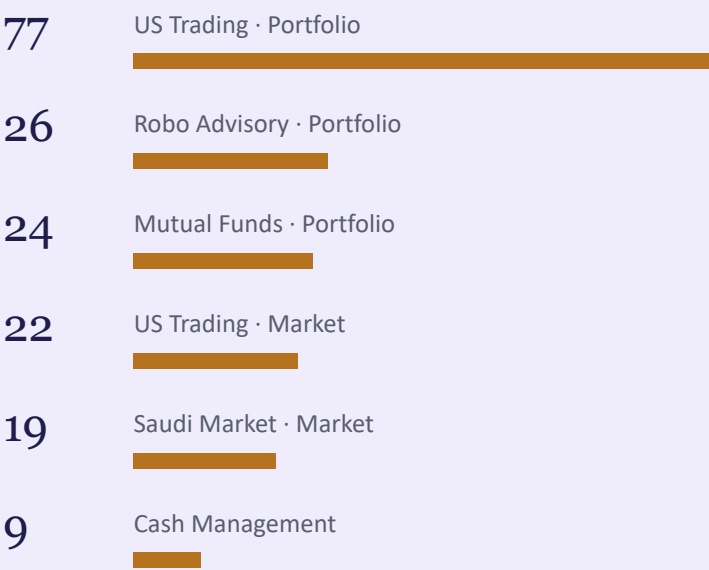

18 named capabilities are missing from Mutual Funds, Robo Advisory and US Trading simultaneously.
